

MUSIC OPENS DOORS

Math | Learning music can improve math skills and show that math is practical, useful, and fun in many areas of life.

History, Geography & Culture | Playing music opens the door to studying the history, geography, and culture of other countries

Confidence | Memorizing pieces provides a great way for students to increase confidence in their skills of concentration and ability to memorize.

Friendships | Through taking part in music activities (youth orchestras, bands, choir), homeschooling families are able to meet new people and develop and grow friendships.

Work | Together with their families, homeschoolers may decide to begin teaching music lessons. There are many benefits and rewards in being a music instructor.

Give Back | Music provides the opportunity to give back to others such as by volunteering to play music at a retirement home.

Volunteer | Helping at music events can lead to learning skills such as being a ticket taker, usher, or manager of other volunteers.

Travel | Being part of an orchestra or band may bring the chance to travel for competitions or performances.

Scholarship | With mastery of playing music, students may be able to apply for scholarships to help with covering costs of post-secondary education.

Family | Music can bring siblings and extended family closer as they sing and play together.

Accomplishment | There is the reward of accomplishment, knowing that what one sets out to do can be achieved.

Discipline | Students can develop discipline as they put in the time and effort to practice and master a new music piece or technique.
